HEARTFEAST

Biography

Heartfeast is an experimental progressive rock band from Santa Cruz, California. The debut album, *Creative Control*, is an instrumental record built on an unusual creative process. Drummer Gianni Castelli creates the rhythmic foundations first with unusual time signatures, polyrhythms, and unexpected structures, and then Jason Greenberg composes guitar, bass, and sonic textures over the beats. The result is something entirely unique.

The genre-fluid album touches on alternative rock, prog, blues, funk, reggae, ska, punk, metal, psychedelic, and experimental territory - often within a single track. *Creative Control* was mixed and mastered by Grammy-nominated, multi-platinum producer/engineer Ulrich Wild.
